

JET RENU

Fitness

Hard Surface Cleaner

Multi-Purpose Disinfectant

Germs are bacteria, viruses, fungi, and protozoa. They are microscopic organisms that thrive in diverse environments. Throughout any given workday, employees use their hands to shake hands with a new client, open doors, cover a sneeze and much more. Germs are constantly mutating to breach your immune system's defenses.

Helps in the elimination of germs!

Fitness Renu is designed to aide in the *elimination* of those nasty gross germs and viruses left behind on gym equipment, dirty locker room surfaces, school desks,

tanning salons, medical, casinos, high traffic establishments and almost any where else you want to wipe and clean a surface.

**You can't see them,
but Germs are
Everywhere!**

Easy to USE!
Spray on, wipe off, perfect for hard to reach areas while making plastic look new again with a high gloss shine.

**Sizes
